Venue : L. D. College of Engineering, Navrangpura, Ahmedabad-380015 (Guj.), INDIA

About:

During the last decade the industrial development has moved on fast putting which has witnessed progressed in various dimensions in the Gujarat State and worldwide. The things stand today tribology – a branch of science and technology of rubbing surfaces has become an integral part of day to day life. It is not surprising to see that in the human body the blood works as a lubricant. This means the bio tribology has been in existence since the inception of the human being. Therefore it was deemed appropriate to bring academician and engineers under one platform to interact with one another. Thus, this conference has been designed to serve the purpose up to some extent in this direction. Very well this mutual sharing of knowledge may lead to solution of some tribological problems, ultimately leading to it using industrial design. Persons from industry and academic have been craving for the experimental aspects and theoretical aspects. So this conference may provide a platform to share their views which may concretize in the long run.
