

PUT YOUR TITLE HERE (IN CAPITALS)

Author 1¹, Author 2¹ and Author 3^{2*}

¹Author affiliation (do not change the font in the whole document)

²Author affiliation

*Corresponding author (E-mail: xxx@yyy.zzz)

KEY WORDS: Max of six key words separated by a ‘;’

ABSTRACT

A 250 word abstract needs to be filled here. The abstract should contain the following

- 1) Background
- 2) Experimental/Computational details
- 3) Results
- 4) Discussion
- 5) Conclusions(should not be a repeat of the results)

INTRODUCTION

Past work done in this field, with references being discussed in at least a line.

The present work and why this work would be useful in the context of the past work. Please give references as and when it is cited in the bold format [1], [2-5], [2, 7-9].

EXPERIMENTAL/COMPUTATIONAL DETAILS

This section should contain all the details of the experiments/computational work done. As much detail is welcome here.

Figures should be embedded in the text.

Fig. 1: The figure captions should give as much detail as possible. This font size is ‘10’

RESULTS

This section should contain the results. Each figure being used here must be clearly explained and as much detail of the figures can be given.

Fig. 2: Give all the data that the figure pertains to. A person reading the figure caption should be able to follow what is going on.

DISCUSSION

In this section the results got should be discussed in detail. Why the results were got and the reasons why you feel that the results came about has to be there in this section. Please give additional data/figures and/or also refer to papers in this section to help strengthen your discussion.

Additional figures/data can be used here to help you discuss the reasons for your results

Figure 3:.

CONCLUSIONS

- The salient results have to be put here.
- The reasons why these results have been got need to be put here. This is an important part of the conclusions. In other words, the conclusions should not be a repeat of the results.

ACKNOWLEDGEMENTS

Do acknowledge people and funding agencies who might have helped in the worked carried out in this paper.
